Frequency Lists a few freq Sorry they are so long -
I take every relevent freq I can find for the
condition and run so they are generally applicable
to a broad spectrum of potential I would like to be
able to identify the "best" This may not be possible

without correct diagnosis so maybe this is the best that can typically be The head/chest "colds" being treated with below freqs may very well be caused by bacteria and viral ones will not be cured by these Frequencies are listed in numerical I think it matters in what order they are I think that if any freq between;800;

3124;and (esp is a tablespoon or more of yogurt or a beneficial bacteria supplement should be used

IMPORTANT NOTES: Unless otherwise general antiseptic frequencies;784;880;

3125;should be used in addition to sets below and these will typically produce the most such that the long list may not have to be FORGET THEM! In many diseases are caused or contributed by lack of nutrients and toxin These _must_ be For it is unlikely that MS can be helped a great deal without adequate vitamin and other and lasting improvement or maintenance will not be achieved without removing mercury or other See individual regimens in maladies section of homepage for regimens in addition to frequencies ----- IN
